Please replace paragraph number [0021] with the following rewritten paragraph:

One embodiment of the present invention is a robot, such as robot cleaner 100, that includes a sensor 102 producing multiple indications of distances to the closest object in an associated portion of the environment. A processor 118 receives indications from the sensor, determines a feature in the environment and controls a motion unit to avoid the feature.—~~A determined feature can be indicated in an internal map.~~ A determined feature can be indicated in an internal map. The determined feature can be a step, an object in a room, or other element.
